

# Cables

for hybrid and battery vehicles

**More than 75 years of experience in cable and wire manufacturing** as well as in **measurement technology** turned a one-man business into a company with more than 550 employees. We prove our strength every year with **with more than 1500 special products** according to customers' requirements. Each product is a new challenge for our creative technical team. We at SAB see ourselves as **a manufacturer and a service provider** – in the sense of true partnership and the greatest possible customer orientation.

Today, the quality of our products is known and appreciated in more than 100 countries around the world. In all product ranges, we are certified according to **DIN EN ISO 9001**. Furthermore, we have implemented an environmental management system for our company according to **DIN EN ISO 14001**, an occupational safety and health management system according to **NLF/ILO-OSH** and **DIN ISO 45001**, and an energy management system according to **DIN EN ISO 50001**.

And also for the future, our slogan is:

**WE GO FORWARD!**

## FOUNDATION

- » 1947 by Peter Bröckskes Sr.
- » an independent, medium-sized company

## MANAGEMENT

- » Peter Bröckskes and Sabine Bröckskes-Wetten

## EMPLOYEES

- » 574 employees worldwide, approx. 430 at the plant in Viersen

## PRODUCTS

- » Special Cables
- » Measurement Technology
- » Cable Harnessing

## YEARLY SALES

- » over 134 Mio. € worldwide

## PLANT AND LOCATION

- » in Viersen (Lower Rhine), 110.000 m<sup>2</sup> company site
- » own production in Germany from copper conductor to outer sheath
- » VDE approved burnchamber and laboratory within the company

## CERTIFICATES AND APPROVALS

- » Quality management system acc. to DIN EN ISO 9001 for every manufacturing field
- » Environmental management system acc. to DIN EN ISO 14001
- » Occupational Safety and Health Management System acc. to NLF/ILO-OSH and DIN ISO 45001
- » Energy management system acc. to DIN EN ISO 50001

## 1947 - 1989

Peter Bröckskes Sr.

**Proactive visionary:** Peter Bröckskes Sr. was a successful company founder with determination, diligence and a pioneering spirit. He started in 1947 as a one-man business with the building of alarm systems and continuously developed new products. In the course of his entrepreneurial activity, he overcame setbacks and repeatedly managed to identify gaps in the market and develop new products.

## 1989 - 2017

Peter Bröckskes

After studying business administration, Peter Bröckskes joined the company in 1980 as sales manager and takes over the management in 1989. Under his leadership, the company's strategy shifted. Away from the trading business, towards becoming a special cable manufacturer and problem solver. Despite economic challenges, the company grows.

## since 2011

Sabine Bröckskes-Wetten

After her apprenticeship as a cable production mechanic and studies to become an industrial engineer, Sabine Bröckskes-Wetten joined the company in 2007. She became a departmental management position in production and later assumed overall responsibility for the technical area. In 2011 Sabine Bröckskes-Wetten became the new owner of SAB Bröckskes and successfully focussed on expansion, quality and service.

## HV 1000 C - SC

robust, flexible high-voltage single conductor with overall copper screen

### Application

These high-voltage cables can be used in high-voltage applications e.g. in the fields of agricultural vehicles, construction vehicles and special vehicles. The HV 1000 C - SC is used e.g. between inverters and electric motors.

## HV measuring cable (DC)

for DC voltage measurement

### Application

The high voltage measuring cable is used in the development of electric vehicles where scoop-proof testing and measuring of up to 1800 V DC operating voltage and application in the HV environment of electromobility take place. Examples of applications are HV power electronics, HV batteries, electric motors, inverters, etc. High voltage measuring cables are used on the test benches and in test vehicles.

for AC voltage measurement

### Application

The high voltage measuring cable is used in the development of electric vehicles where scoop-proof testing and measuring of up to 1800 V DC operating voltage and application in the HV environment of electromobility take place. Examples of applications are HV power electronics, HV batteries, electric motors, inverters, etc. High voltage measuring cables are used on the test benches and in test vehicles.

### Construction

Conductor:	tinned copper strands, extra fine wires
Core insulation:	FEP
Colour code:	brown, black, grey
Stranding:	together with tinned copper drain wire, AWG 24
Screen:	alu foil and tinned copper braiding
Inner sheath:	FEP – blau acc. to RAL 5024
Outer sheath:	PUR
Sheath colour:	orange with black vertical stripes

### Outstanding features

- » high flexibility
- » high abrasion resistance
- » easy harnessing
- » temperature resistance -50 °C up to +150 °C (up to 3000 hours)

### Technical Data

## B 110 C

highly flexible Besilen® HV single core, shielded, cULus recognized

### Application

The connection cable is for example appropriate to connect converters to electric-mobility test benches. Due to the high voltage rating, the cable can be used for various components and power electronics. The extremely flexible cable design enables an easy laying.

## B 107

highly flexible Besilen® HV single core, unshielded, cULus recognized

### Application

The highly flexible single core is particularly appropriate for the application on electric test benches. Due to the fine stranding and the resulting flexibility, the cable can be installed easily. The high voltage single core is designed for a voltage range up to 1,8/3 kV. In this way it fulfils the increasing demands within the voltage class.
